EDUCATION

NUS BUSINESS SCHOOL, NATIONAL UNIVERSITY OF SINGAPORE

Aug 2026 - Sep 2027

Master of Science in Business Analytics

SRM INSTITUTE OF SCIENCE & TECHNOLOGY, CHENNAI

Aug 2020 - May 2024

B.Tech in Computer Science with Business Systems, CGPA: 9.58 / 10

WORK EXPERIENCE

PwC Acceleration Center (India)

Aug 2024 - Jun 2026

Associate, Data & Analytics

Bangalore, India

- Modeled and transformed source data in DBT on Snowflake, pulling data in through AWS Glue, to migrate a client off a 30-year-old legacy platform from kickoff through handover.
- Developed automated Power BI dashboards backed by SQL to replace manual reporting, reconciling new dashboards against legacy system reports to validate data accuracy ahead of go-live.
- Built IICS pipelines during a source system migration, then performed quality assurance testing and root-cause analysis on migrated pipelines, fixing pipeline logic behind client-flagged data discrepancies and working directly with clients to clarify design decisions or trace issues back to source-data problems on the client side.
- Converted IBM DataStage jobs and JCL scripts into SQL-based Databricks jobs during system integration testing for a Teradata-to-Databricks migration, validating job sequencing and schedules and troubleshooting failures to confirm each conversion ran correctly.
- Partnered with global clients to translate ambiguous business problems into structured, scoped analytics solutions, keeping outcomes aligned with client priorities and delivery timelines.
- Presented analytical insights and recommendations to senior stakeholders, supporting data-driven decision-making.
- Mentored interns, assigning tasks and walking new hires through pipeline and project workflows to support faster onboarding.

PwC Acceleration Center (India)

Apr 2024 - Aug 2024

Intern, Data & Analytics

Bangalore, India

- Benchmarked statistical (ARIMA, Holt-Winters) against machine learning (Random Forest, XGBoost) forecasting models at the SKU level for a major homebuilding client, confirming statistical approaches were more accurate.
- Applied these findings across four product categories (taps, doors, handles, and bathtubs) to guide SKU-level inventory recommendations for stakeholders.
- Documented and organized engagement outputs, delivering clean, well-structured deliverables for efficient stakeholder review.

TECHNICAL SKILLS

- Analytics & Programming:** Python, SQL, R, Machine Learning
- Data & Cloud Platforms:** Azure, AWS, Snowflake, Databricks, DBT, Informatica IICS, Teradata
- Visualization:** Power BI, Tableau
- Professional Skills:** Client Communication, Team Collaboration, Problem Solving
- Languages:** English (Fluent), Hindi (Fluent)

CERTIFICATIONS & PROGRAMS

- Microsoft Azure: AZ-900, AI-900, DP-900
- AWS Machine Learning: Model development using Amazon SageMaker
- McKinsey Forward Program: Problem-solving, data-driven decision-making, professional skills

LEADERSHIP & AWARDS

- Amazon ML Summer School 2023: Selected participant, advanced machine learning curriculum
- Earned an Academic Scholarship from SRM Institute of Science & Technology for strong academic performance (2020 - 2021)
- Coordinated event logistics and operations as Head of Logistics for the IEEE SRM Student Chapter, and served as an active member of Women in Engineering (WIE)
